EXPERIENCE

Webninjaz Technologies

Sep 2025 – Present

Associate Analyst

- Developed responsive UI components using React and Next.js, improving cross-device usability and user experience.
- Integrated REST APIs to enable dynamic frontend functionality and seamless data flow.
- Built Python-based automation scripts, reducing manual effort by **60%** and improving workflow efficiency.
- Developed web scraping pipelines to extract and process structured data from multiple web sources.
- Designed and implemented AI-driven backend solutions using **Python** and **FastAPI** for intelligent data processing and automation.
- Collaborated with the team on debugging, testing, and deployment across the development lifecycle.

JOVAC (GLA University)

June 2024 – July 2024

Full Stack Development Training

- Developed multiple full-stack applications using JavaScript, HTML/CSS, and Node.js.
- Implemented backend APIs and integrated them with frontend interfaces for dynamic applications.
- Worked on debugging and testing, improving application stability and reducing runtime errors.
- Collaborated in team-based development environment, following structured coding practices.
- Gained hands-on experience with version control systems like Git and GitHub.

PROJECTS

Corporate Professional KYC Automation | Python, AI Agents, Web Scraping, PostgreSQL **Live**

- Designed scalable backend architecture and database schema for a KYC automation platform handling structured financial data.
- Developed REST APIs using **FastAPI**, improving response time and system efficiency by **40%**.
- Built AI-powered agents to automate web scraping tasks, reducing manual data collection effort by **70%**.
- Implemented robust data pipelines for cleaning, validation, and storage, improving data accuracy by **50%**.
- Optimized scraping workflows with concurrency and retry mechanisms, increasing extraction speed by **60%**.
- Ensured modular and maintainable code structure for scalability and future integrations.

PDF Bot AI-Powered Document Query System | Python, FastAPI, PostgreSQL, AI **API Docs**

- Developed a PDF-based AI chatbot that enables users to upload documents and retrieve contextual answers.
- Built REST APIs using **FastAPI** for document processing and chat interactions, improving system efficiency by **45%**.
- Implemented AI-powered document parsing and semantic search, reducing manual document lookup by **80%**.
- Integrated **PostgreSQL** for document metadata and user data management.
- Optimized document indexing and retrieval workflows, improving query performance by **60%**.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, SQL

Backend Technologies: Node.js, Express.js, FastAPI, REST APIs, WebSockets, Cron Jobs

Frontend Technologies: React.js, HTML, CSS, TypeScript

Database Systems: MongoDB, MySQL, Redis

Tools and Platforms: Git, GitHub, GitLab, GitHub Actions, Postman, Linux, VS Code

Data & Automation: Web Scraping, Automation Scripts, AI Agents, Generative AI, Data Pipelines

EDUCATION

GLA University, Mathura

B.Tech in Computer Science Engineering

Expected May 2026

CPI: 7.68
